 Notice of References Cited (PTO-892) Notice of Draftsperson's Patent Drawing Review (PTO-948) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date 6-9-04. 	4) Interview Summary Paper No(s)/Mail Da 5) Notice of Informal P 6) Other:					

Application/Control Number: 09/521,107

Art Unit: 2857

1. The listing of references in the specification (see page 5 of the specification) is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

The Remarks section of the Applicant's reply filed 9-2-04 indicates that the references cited in the specification have also been made of record. However, the Engineer's manual for calculating reliability cited at the bottom of page 5 of the specification has not been cited on any of the IDS's. Thus, paragraph 5 from the prior Office action has been repeated above.

2. Claims 1-14 are objected to under 37 C.F.R. 1.75(a) for failing to particularly point out and distinctly claim the subject matter which the applicant regards as the invention. Claim 1, line 3, cites "specifying the types of fault.." which it appears should be "specifying the types of faults..". Claim 1, line 7, cites "determining first fault rates by statistical random samples" but statistical random samples of what exactly are being referred to here ? Claim 1, line 9, cites "..each second fault rates" which it appears should be "each second fault rate". Claim 3, step a, cites "first fault rates" however there is already antecedent basis for this in claim 1. Claim 5, line 2, cites "... α and α are selected.." however it is not clear why α here is repeated twice. Claim 8, lines 2-3, cite "the random variable characterizing the reliability is a susceptibility to faults, a downtime, costs of standstill, repair and maintenance.." however was this intended to be

Art Unit: 2857

"the random variable characterizing the reliability is a susceptibility to faults or a downtime or costs of standstill or repair and maintenance..". Claim 10 contains steps labeled as "a)" and "b)" however there are already steps in claim 9 from which this claim depends that are labeled as steps a and b. Claim 10, line 3, cites "..the first and third types of fault..." however is this referring to the first and third types of fault rates? Claim 13, line 3, cites "..the first and second probability distributions" however is this referring to "the first and second limiting probability distributions". The examiner asks the applicant to better claim the limitations cited above. While the examiner understands the intentions of the applicant he feels confusion could be drawn from the limitations cited above. Appropriate correction is required.

Claim Rejections - 35 USC § 101

- 35 U.S.C. 101 reads as follows:
 - Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
- 4. Claims 1-14 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims recite a series of mathematical operations (calculating, estimation, probability distribution determinations, etc.) which can be done on paper as the claimed invention is not computer-implemented and it not clear that the final end result of the mathematical operations are being directed toward a practical application.

Application/Control Number: 09/521,107

Art Unit: 2857

5. Applicant's arguments with respect to claims 1-14 have been considered but are

moot in view of the new ground(s) of rejection.

No claims are allowed.

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Hal D. Wachsman whose telephone number is 571-272-

2225. The examiner can normally be reached on Monday to Friday 7:00 A.M. to 4:30

P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Marc Hoff can be reached on 571-272-2216. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
